

## VISITOR GUIDE: Patients on Isolation Precautions

The patient you are visiting is on isolation precautions which means more infection prevention measures are required.

- Visitors to these specific patients **MUST** wear the protective equipment (PPE) **listed below REGARDLESS of vaccination status.**
- If you are unable to comply with the PPE requirements, you will **not be permitted to visit.**

The PPE kit you have received includes:

**GOWN**

**GLOVES**

**GOGGLES**  
(Eye glasses alone  
are not acceptable)

**MASK**

All of the equipment is disposable and should be removed and discarded when you leave the room at the end of your visit. **Please use proper hand hygiene when removing your gown and gloves and before removing your mask and goggles.**

Please review the information provided. If you have additional questions, please ask the nurses on the unit you are visiting.
